

# TRANSFORM YOUR CONSTRUCTION SITE:

Manual vs. BuildRun

# DISCOVER 5 WAYS

to boost efficiency  
and quality

1.

SOP Compliance & Quality

2.

RFI & QC Timing

3

Escalation Matrix

4.

Document & Data Capture

5.

Visibility & Planning

## Manual Method

- SOPs on paper ignored due to junior-staff attrition.
- Inconsistent execution bad quality and rework.

## Buildrun Advantage

- Digital SOP templates & checklists enforce every step.
- Pre-start & post-completion QC tiers with real-time photo evidence.
- One single source of truth. No task proceeds without compliance.

# RFI & QC Timing

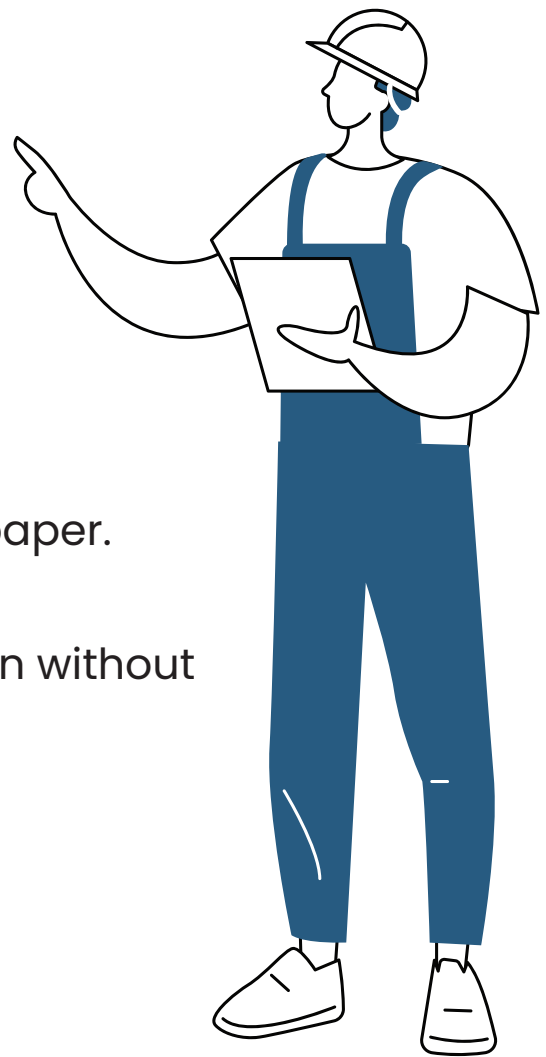

---

## Manual Method

- RFIs/checklists raised late or on paper.
- QC gaps- subsequent tasks begin without tests (leak, slope, thick plaster).

## Buildrun Advantage

- Instant, mobile RFI/checklist generation the moment site ready for inspection.
- Automated multi-level QC workflows block progression until sign-off.
- You never miss a critical test or delay your next task.

# Escalation Matrix

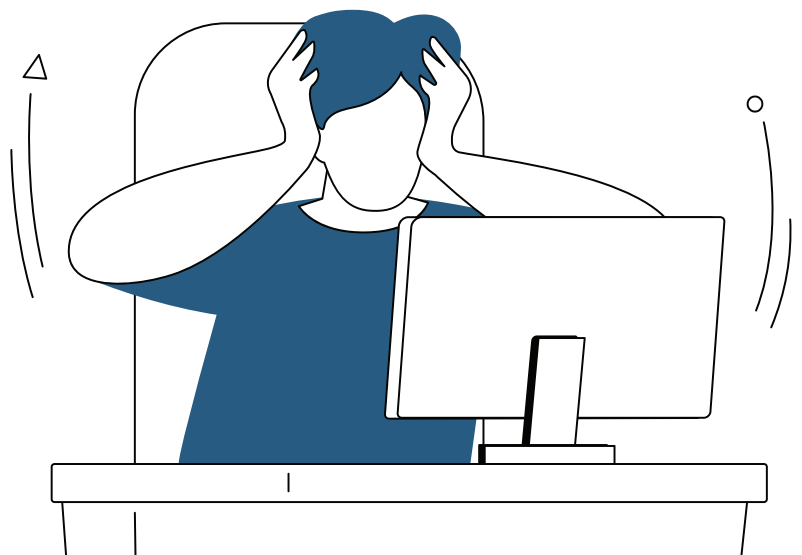

---

## Manual Method

- No on-site escalation paths hidden issues
- Delays stack up before management becomes aware

## Buildrun Advantage

- Built-in escalation rules alert the right person instantly.
- SLA timers & reminders keep every issue on track.
- Proactive issue management no more last-minute firefighting.

# Document & Data Capture

## Manual Method

- Photos, checklists, method statements scattered across WhatsApp, Excel, drives.
- PMs waste hours hunting for drawings and approvals.

## Buildrun Advantage

- Mobile uploads of photos, docs, drawings, and method statements tagged to tasks.
- Centralized in-app repository for everything at your fingertips.
- True single source of truth for instant decision-making.

# Visibility & Planning

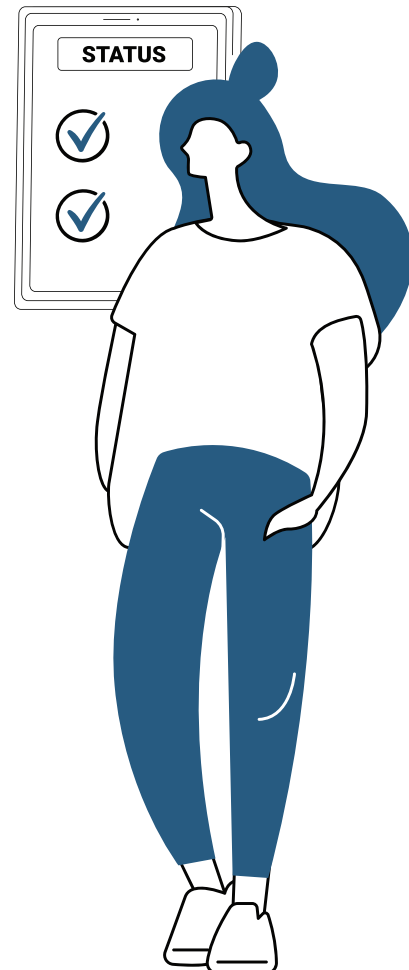

---

## Manual Method

- Fragmented updates PMs blind to real progress.
- No portfolio view; float changes never tracked.

## Buildrun Advantage

- Real-time portfolio dashboard shows % complete, critical path, workfront availability.
- Mobile capture of actual starts, progress, & completions.
- Buffer management and risk alerts help you stay ahead of delays.
